Aumento Performers Solutions Pvt.Ltd
Ernakulam,Kerala
July 2019 – Jan 2020

- **IT Support Administrator**

MEGA INFOTECH

Perinthalmanna,Kerala

May 2016 – Jan 2017

PROJECTS

Project 1

SMART ENERGY METER(SEM)

Tools & Technologies

Java(JDK 7),XML(Android Development Tool),PHP,MySQL

SMART ENERGY METER is a web app. This system controls automated energy meter which is having capabilities like remote monitoring and controlling of energy meter.Autmoatic meter reading monitors the energy meter and sends data on request of service provider through SMS.The application sends electricity bill by e-mail, SMS or post. It helps to notify the consumers who have outstanding dues; otherwise electricity board can disconnect the power of consumer. Companies can re-connect the power after deposition of dues.

Future Enhancement:

The application SEM is designed and developed according to the current information and problems in the KSEB Bill Reading, Bill Generation and Online Bill Payment and Assessment. This is very flexible and it can reduce the Man Power in the use of taking reading and providing the Bill. It is capable to overcome current problems that face by electricity consumers. Every user is seeking for the simple and fastest method.

Currently we are using android devices instead of smart meter. We will design a embedded smart meter for future for reduce the budget.
